## **Value added course on Medical Law and Communication Skills** **(For post graduates, interns)**

- **‘Medical Law and Communication Skills’**

The medical profession is not merely an occupation of highly learned and skilled individuals, it also includes a strong and inseparable, moral commitment made towards the public for its welfare and for improving health status of the people. Good medical practice is based on relationship of trust between the profession and the society, in which doctors are expected to meet the highest standard of professional practice and behaviour. It involves the partnership between patient and doctor that is based on mutual respect, confidentiality, honesty, responsibility and accountability. Therefore, practice of medicine has special characteristics, doctors deal directly, and at times when person is most vulnerable, with the immediate issues of life and death, health and illness.
